Global Equities (Eur Hedged) - “L”

A Sub-Fund of New Millennium

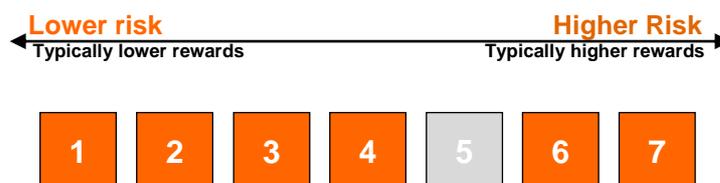

“Capitalization” shares (ISIN LU1148873588)

This SICAV is managed by **NATAM Management Company S.A.**

Objective and Investment Policy

- **Banca Finnat Euramerica S.p.A.** is the Investment Manager of the Sub-fund;
- The aim of the Sub-Fund is to provide real capital growth deriving from the economic development of the countries in which it invests;
- Through discretionary decisions, the Sub-Fund mainly invests in equities issued by companies from all over the world with the exception of the Euro area. Any exposure to securities denominated in Euro and to emerging countries can only have a residual weight in the Sub-Fund’s portfolio;
- Derivative instruments, which are specific financial contracts whose value depends on the market price of a reference asset, can be used also for investment purposes provided that the total commitment does not exceed 50% of the net asset value;
- In order to mitigate exchange rate risks, currency positions are mainly hedged against the Euro;
- A wide degree of discretion is allowed with respect to the **benchmark** which is made of:
 - 95% MSCI world ex EMU Tot. Ret. Euro Hedged (MOWOMHEU);
 - 5% Bloomberg Barclays 3M Euribor TR (LS01TREU)
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years
- Investors may trade their shares on any business day for Luxembourg banks provided that the stock exchange in which the shares are tradable is open for trading and that it is possible to cope with the orders
- All income is, normally, reinvested

Risk and Reward Profile

- The risk category is based on a synthetic indicator linked to historical data over a 5-year period and is not a reliable indication about the future risk profile of this class of shares; it is not guaranteed and it may change over time;
- The risk indicator for this class of shares is set at 5 because the volatility of its past returns has been medium-high; this is mainly due to the prevalent investment in equity markets;
- The lowest rating does not mean a risk-free investment;
- The calculation for this share class, for the period prior to its launch, was made on the basis of the data of Class “A” which being a pre-existing class of shares, has a long enough track record to make the calculation meaningful;
- This Sub-Fund is not a guaranteed capital fund and the following **risks**, though not detected by the synthetic indicator, can be relevant for the Sub-Fund:
 - The value of equities may change significantly;
 - Emerging markets are characterized by custodial services and settlement of transactions that may be less evolved and less liquid than developed markets. Any investment in these markets is typically more volatile;
 - Derivative instruments can be used to increase, limit or keep the risk level of the Sub-Fund. The strategy implemented by the Manager may not always be successful and the Sub-Fund could therefore incur in significant losses;
 - The use of derivatives, especially OTC (meaning that they are not traded in regulated markets but directly with the counterparties) may imply significant losses if a counterparty defaults and cannot honor its liabilities
